Read: Remove And Replace Carburetor On Leaf Blower. There are two fuel hoses that run from the carburetor to the gas jug. The longer, thicker one has a filter on the end of it and pulls the gas/oil mixture in. The shorter, thinner line comes from the primer bulb, and returns excess gas/oil back to the tank.

How To Replace Fuel Lines On A Leaf Blower

Slide blower motor straight out (it will fall when all the screws are removed. Use a small ratchet/socket to remove the nut that holds the squirrel cage onto the motor, and slide the cage straight off - do this on the old and the new blower motor. Install old cage on new motor, secure with the nut. Reverse steps 1-5 to reinstall blower motor.

Blower Motor Replacement

Remove the screws holding the blower motor to the climate control unit. Carefully slide the motor out of the housing—there will be a plastic wheel on the far side of the motor. Do It Right: These wheels can be brittle, so be careful when handling—if any pieces come off the wheel, it can lose balance and cause dashboard vibration.
