This book uncovers how power operates around the world, and how it can be resisted or transformed through empowered collective action and social leadership. The stakes have never been higher. Recent years have seen a rapid escalation of inequalities, the rise of new global powers and corporate interests, increasing impunity of human rights violations, suppression of civil society, and a re-shaping of democratic processes by post-truth, populist and nationalist politics. Rather than looking at power through the lenses of agency or structure alone, this book views power and empowerment as complex and multidimensional societal processes, defined by pervasive social norms, conditions, constraints and opportunities. Bridging theory and practice, the book explores real-world applications using a selection of frameworks, tools, case studies, examples, resources and reflections from experience to support actors to analyse their positioning and align themselves with progressive social forces. Compiled with social change practitioners, students and scholars in mind, Power, Empowerment and Social Change is the perfect volume for anyone involved in politics, international development, sociology, human rights and environmental justice who is looking for fresh insights for transforming power in favour of relatively less powerful people.

This book deals with the most important developments in the study of political power over the last four decades. From the writings of the great Greek philosophers of antiquity to the present, the idea of power has been the major subject in the study of politics. Indeed, some would say it defines the very field of politics itself as a social science. Penned by the leading scholars in the field, this collection gives a broad overview of the most important issues in the study of political power, tracing the evolution of scholarly thinking about them and in doing so revealing crucial innovations therein. This will be a major contribution in the understanding of the concepts and practices of how power manifests itself across social and political contexts. This book will be of great interest to scholars, students and individuals who wish to understand the very foundations of social and political life. The chapters in this book were originally published as a special issue of the Journal of Political Power, volume 14, Issue 1 (2021).

In the Enlightenment tradition, rationality is considered well-defined. However, the author of this study argues that rationality is context-dependent, and that the crucial context is determined by decision-makers' political power. He uses a real-world Danish project to illustrate this theory.

This social work book is the first of its kind, describing practical steps that social workers can take to shape and influence both policy and politics. It prepares social workers and social work students to impact political action and subsequent policy, with a detailed real-world framework for turning ideas into concrete goals and strategies for effecting change. Tracing the roots of social work in response to systemic social inequality, it clearly relates the tenets of social work to the challenges and opportunities of modern social change. The book identifies the core domains of political social work, including engaging individuals and communities in voting, influencing policy agendas, and seeking and holding elected office. Chapters elaborate on the necessary skills for political social work, featuring discussion, examples, and critical thinking exercises in such vital areas as: Power, empowerment, and conflict; engaging effectively with power in political settings. Getting on the agenda; assessing the political context and developing political strategy. Planning the political intervention; advocacy and electoral campaigns. Empowering voters Persuasive political communication. Budgeting and allocating resources. Evaluating political social work efforts. Making ethical decisions in political social work. Political Social Work is a potent reference for social work professionals, practitioners, and students seeking core political knowledge and skills to practically advance their work. For specialists and generalists alike, it solidifies political action as vital for the evolution of the field.

Empowerment of those living in poverty is both a critical driver and an important measure of poverty reduction. This report aims to build donor understanding of empowerment and how best to support it.

Focusing on the term empowerment this book examines the various meanings given to the concept of empowerment and the many ways power can be expressed - in personal relationships and in wider social interactions.

Many people want to help bring about changes in their neighborhoods, workplaces, and communities. Leaders and scholars of change efforts are likewise eager for insights into what makes some organizations and coalitions capable of building and exercising power. Why are some groups successful in making changes in policies and systems and in sustaining their momentum over time, while others struggle or never really get off the ground? With Community Power and Empowerment, Brian D. Christens brings the most comprehensive analysis of empowerment theory yet conducted to bear on these questions, taking aim at many of the longstanding weaknesses and ambiguities of empowerment theory, research, and practice. For example, one major hindrance is that most notions of empowerment have not been coherently connected with community power. In addition, research has emphasized psychological aspects of empowerment over organizational processes, and has neglected community empowerment processes to an even greater extent. By linking empowerment and community power, Christens constructs a holistic framework for assessing and comparing community-driven change efforts. This book offers new guidance for inquiries into outcomes and impacts of empowerment processes on health and well-being, providing a resource for researchers, organizational leaders, practitioners, and anyone interested in collective action for change.

This SAGE Handbook presents contemporary, cutting-edge approaches to participatory research and inquiry. It has been designed for the community of researchers, professionals and activists engaged in interventions and action for social transformation, and for readers interested in understanding the state of the art in this domain. The Handbook offers an overview of different influences on participatory research, explores in detail how to address critical issues and design effective participatory research processes, and provides detailed accounts of how to use a wide range of participatory research methods. Chapters cover pioneering new participatory research techniques including methods that can be operationalised at scale, approaches to engaging the poorest and most marginalised, and ways of harnessing technologies to increase the scope of participation, amongst others. Drawing upon a wide range of disciplines, and bringing together contributing authors from across the globe, this Handbook will be of interest to an international readership from across the broad spectrum of social sciences, including social policy, development studies, geography, sociology, criminology, political science, health and social care, education, psychology, business & management. It will also be an insightful and practical resource for facilitators, community workers, and activists for social change. Part 1: Introduction Part 2: Key Influences and Foundations of Participatory Research Part 3: Critical Issues in the Practice of Participatory Research Part 4: Methods and Tools Part 4.1: Dialogic and Deliberative Processes Part 4.2: Digital Technologies in Participatory Research Part 4.3: Participatory Forms of Action Orientated Research Part 4.4: Visual and Performative Methods Part 4.5: Participatory Monitoring, Evaluation and Learning Part 4.6: Mixing and Mashing Participatory and Formal Research Part 5: Final Reflections

This book provides an approach for promoting citizen participation; separating human rights, rule of law, development, and governance, reconnecting them in order to create an integrated approach to rights-based political empowerment; delving into questions of citizenship, constituency-building, social change, gender, and accountability.

This book provides an interdisciplinary examination of the multiple meanings of 'empowerment.' Rather than seeking to define and critique this term, it draws out a range of different meanings, exploring diverse possibilities for action and engagement. We must carefully examine the possibilities and limits of the approaches to empowerment we choose. Efforts focused on building individual skills and capacities, for example, may overlook opportunities for supporting more collective, community-based forms of social action. In concise chapters, the book maps out a range of ways that people can be empowered along different continuums of power, moving from more familiar forms of teaching and counselling to less common and more radical strategies for fostering solidarity and civil resistance. This will be of great interest to advanced students and scholars in a wide variety of fields, particularly social work, public health, sociology, education, and international development as an introductory yet comprehensive study of the nuances of empowerment.
