The 40 Inventive Principles The 40 Principles are solution triggers, very general ideas of how to solve a contradiction. They are the easiest TRIZ tool to use, and the one most likely to give us good solutions fairly easily and quickly. They are the total number of ways (40) the world has found to solve contradictions.

TRIZ (Theory of Inventive Problem Solving) is a powerful methodology which is able to improve a company's top-line and bottom-line. The top-line refers to a company's gross sales or revenues, whereas the bottom-line is a company's net earnings or net profits. The uniqueness of TRIZ is its ability to provide a structured and systematic approach, coupled with a suite of tools to enhance both top-line and bottom-line results. TRIZ can

be used for creating new products to generate sales or making processes more efficient and effective to reduce operating costs and expenses. TRIZ also enhances management capabilities by transforming a good manager to a great manager by acquiring tools to recognize contradictions when they arise and solve them without compromise. In summary, TRIZ is a philosophy, process, and suite of tools. A total of 11 TRIZ tools (Function Analysis, Cause & Effect Chain Analysis, Perception Mapping, Ideality, S-curve, Trends of Engineering System Evolution, Trimming, Feature Transfer, Function Oriented Search, 9-Windows, and Engineering Contradiction) are discussed in

detail. Numerous examples and case studies are used to illustrate TRIZ applications in accelerating the ability to predict product, process, and service trends; identify unique value propositions for new products or services; circumvent patents of competitors; and solve age-old or chronic problems in both business and management fields.

TRIZ is the Russian acronym for theory of inventive problem solving. The basic assumption behind this theory is □someone somewhere has already solved your problem or a very similar problem, and all we need to do is apply the same principle to the current problem and solve it similarly.□ It guides you to think

In a specific direction rather than getting lost. The goal of this book is to use some of the simple TRIZ tools to help readers immediately solve problems, innovate, be creative, think, and discover the joy of experiencing the thinking process in new dimensions that you might not have previously. It is specifically focused on helping nonengineering and management professionals to apply the concepts of TRIZ immediately and reap benefits. Interspersed throughout the book are vignettes from the author's round-the-world bicycle tour on a budget of less than five U.S. dollars per day, having conducted close to 50 workshops and training sessions and trained more than 1,000 professionals on TRIZ without any

allows readers to make immediate use of its most basic concepts. The Ideal Final Result reviews the basics of this left brained, but at the same time, very creative process for problem solving that uses a basic algorithm developed through the study of millions of patents. As opposed to psychologically based tools relying on the generation of hundreds of ideas to be sorted through to find the few of value, TRIZ rigorously defines the problem and assists the problem owner in identifying the existing inventive principles that are already known to solve that class of problems. This book reviews the most basic of the TRIZ algorithm tools and provides
