This collection of essays examines various rituals and ceremonies in American popular culture, including architecture, religion, television viewing, humor, eating, and dancing.

In this new edition of *Questioning the Millennium*, best-selling author Stephen Jay Gould applies his wit and erudition to one of today's most pressing subjects: the significance of the millennium. In 1950 at age eight, prompted by an issue of *Life* magazine marking the century's midpoint, Stephen Jay Gould started thinking about the approaching turn of the millennium. In this beautiful inquiry into time and its milestones, he shares his interest and insights with his readers. Refreshingly reasoned and absorbing, the book asks and answers the three major questions that define the approaching calendrical event. First, what exactly is this concept of a millennium and how has its meaning shifted? How did the name for a future thousand-year reign of Jesus Christ on earth get transferred to the passage of a secular period of a thousand years in current human history? When does the new millennium really begin: January 1, 2000, or January 1, 2001? (Although seemingly trivial, the debate over this issue tells an intriguing story about the cultural history of the twentieth century.) And why must our calendars be so complex, leading to our search for arbitrary regularity, including a fascination with millennia? This revised edition begins with a new and extensive

preface on a key subject not treated in the original version. As always, Gould brings into his essays a wide range of compelling historical and scientific fact, including a brief history of millennial fevers, calendrical traditions, and idiosyncrasies from around the world; the story of a sixth-century monk whose errors in chronology plague us even today; and the heroism of a young autistic man who has developed the extraordinary ability to calculate dates deep into the past and the future. Ranging over a wide terrain of phenomena--from the arbitrary regularities of human calendars to the unpredictability of nature, from the vagaries of pop culture to the birth of Christ--Stephen Jay Gould holds up the mirror to our millennial passions to reveal our foibles, absurdities, and uniqueness--in other words, our humanity.

Spaceships travel through time at lightspeed, piloted by human clones and talking animals. Serious injuries are healed with the wave of a medical gizmo. The media make it all look so real. Can scientists hope to one day accomplish these feats? This book is a fun look at what can, and can't, be achieved with current technology.

A forty-year history of the largest circulated magazine in the United States reveals TV Guide's erratic stances on social issues and chronicles how the publication moved from an industry watchdog to a more commercial, popular format.

This book critically approaches contemporary meanings of materiality and discusses ways in which we understand, experience, and engage with objects through popular culture in our private, social and professional lives. Appropriating Arjun Appadurai ' s famous phrase: "the social life of things", with which he inspired scholars to take material culture more seriously and, as a result, treat it as an important and revealing area of cultural studies, the book explores the relationship between material culture and popular practices, and points to the impact they have exerted on our co-existence with material worlds in the conditions of late

modernity.

This book is about war and popular culture, and war in popular culture. Tara Brabazon summons, probes, questions and reclaims popular culture, challenging the assumptions of war, whiteness, Christianity, modernity and progress that have dominated our lives since September 11. It is essential reading for any scholar of cultural studies and popular culture, media and journalism, creative writing and terrorism studies.

"Examines the relationship between science and the fiction developed by modernists, including Musil, Proust, Kafka, and Joyce. Looks at Pascalian and Newtonian cosmology, Darwinism, epistemology, relativity theory, quantum mechanics, the development of modernist and postmodern fiction, positivism, and finally works by Woolf, Faulkner, and Borges"--Provided by publisher.
