Written by Steven Collings, winner of Accounting Technician of the Year at the British Accountancy Awards 2011, this book deals with the significant changes auditing has undergone in recent

years, due in large part to well-publicised corporate disasters such as Enron and Parmalat, which have shaken the profession. In response, many countries have replaced pre-existing domestic standards with International Standards on Auditing (ISAs) in an attempt

to ensure that auditors throughout the world apply the same level of standards during all audit assignments, and that audit quality remains consistent on a global basis.

International Standards on Auditing are frequently updated to improve and clarify their

client receives and audit which is beneficial, cost effective, and which conforms to the prescribed framework; however, auditors are often criticised for failing to do so.

Recognising that auditing is not always an exact science, and that in many cases the auditor is called
