Clinical Evaluation of Language Fundamentals-Third Edition (CELF-3), like Clinical Evaluation of Language Fundamentals-Revised (CELF-R) (Semel, Wiig, & Secord, 1987), is an individually administered clinical tool for the identification, diagnosis, and follow-up evaluation of language skill deficits in school-age children, adolescents, and young adults. CELF-3 was designed to identify individuals ages 6 years 0 months through 21 years 11 months who lack the basic foundations of content and form that characterize mature language use: word meanings (semantics), word and sentence structure (morphology and syntax), as well as the recall and retrieval of spoken language (memory). -- Examiner's manual, P. 1.

"... an individually administered clinical tool for the identification, diagnosis, and follow-up evaluation of language and communication disorders in students 5-21 years old."--page 1 of manual.

Issued for use as a kit, consisting of 4 components, tracks articulation skills from preschool through primary and secondary school years and into young adulthood.
