John Collins, 74, of Islington, Daniel Jones, 58, Terry Perkins, 67, both of Enfield, and Brian Reader, 76, of Dartford, Kent, appeared in the dock at Woolwich Crown Court in south east London.

Each year in the United States, one out of every fourteen students suffers a school injury serious enough to require medical attention and some, in addition, are temporarily disable. In every two-year period, 80 percent of elementary school children see a school nurse for the treatment of an injury. Injury may be the most common condition treated by school health-care personnel. Yet, few schools or school districts have explicit injury prevention programs. Most schools respond to injuries on an ad hoc basis and often only after the damage has been done. Preventing School Injuries examines how and why students are injured in schools and in situations for which school districts can be held responsible. This book provides the motivation, knowledge, and tools needed to create and implement a comprehensive school injury prevention program. And because no injury prevention program can be 100 percent effective, Preventing School Injuries demonstrates how schools can provide a quick, efficient, and effective emergency response to those injuries that occur despite efforts to prevent them.

When snow closes Greg Heffley's middle school, he and his best friend, Rowley Jefferson, face a fight for survival as warring gangs turn the neighborhood into a wintry battlefield.

<p>This project-based guide is a blueprint for service learning—from getting started to assessing the experience—and integrates the K–12 Service-Learning Standards for Quality Practice. It provides ideas for incorporating literacy into service learning and suggestions for creating a culture of service. An award-winning treasury of activities, ideas, annotated book recommendations, author interviews, and expert essays—all presented within a curricular context and organized by theme. Digital Content contains all of the planning and tracking forms from the book plus bonus service learning plans, and more.</p>
<p>Guidelines for implementing the standards and applications contained in the Manual on Uniform Traffic Control Devices.</p>
<p>The NACTO Urban Street Design Guide shows how streets of every size can be reimagined and reoriented to prioritize safe driving and transit, biking, walking, and public activity. Unlike older, more conservative engineering manuals, this design guide emphasizes the core principle that urban streets are public places and have a larger role to play in communities than solely being conduits for traffic. The well-illustrated guide offers blueprints of street design from multiple perspectives, from the bird 's eye view to granular details. Case studies from around the country clearly show how to implement best practices, as well as provide guidance for customizing design applications to a city 's unique needs. Urban Street Design Guide outlines five goals and tenets of world-class street design: • Streets are public spaces. Streets play a much larger role in the public life of cities and communities than just thoroughfares for traffic. • Great streets are great for business. Well-designed streets generate higher revenues for businesses and higher values for homeowners. • Design for safety. Traffic engineers can and should design streets where people walking, parking, shopping, bicycling, working, and driving can cross paths safely. • Streets can be changed. Transportation engineers can work flexibly within the building envelope of a street. Many city streets were created in a different era and need to be reconfigured to meet new needs. • Act now! Implement projects quickly using temporary materials to help inform public decision making. Elaborating on these fundamental principles, the guide offers substantive direction for cities seeking to improve street design to create more inclusive, multi-modal urban environments. It is an exceptional resource for redesigning streets to serve the needs of 21st century cities, whose residents and visitors demand a variety of transportation options, safer streets, and vibrant community life.</p>
