Includes Practice Test Questions Certified Energy Manager Exam Secrets helps you ace the Certified Energy Manager Exam, without weeks and months of endless studying. Our comprehensive Certified Energy Manager Exam Secrets study guide is written by our exam experts, who painstakingly researched every topic and concept that you need to know to ace your test. Our original research reveals specific weaknesses that you can exploit to increase your exam score more than you've ever imagined. Certified Energy Manager Exam Secrets includes: The 5 Secret Keys to Certified Energy Manager Exam Success: Time is Your Greatest Enemy, Guessing is Not Guesswork, Practice Smarter, Not Harder, Prepare, Don't Procrastinate, Test Yourself; A comprehensive General Strategy review with: Make Predictions, Answer the Question, Benchmark, Valid Information, Avoid Fact Traps, Milk the Question, The Trap of Familiarity, Eliminate Answers, Tough Questions, Brainstorm, Read Carefully, Face Value, Prefixes, Hedge Phrases, Switchback Words, New Information, Time Management, Contextual Clues, Don't Panic, Pace Yourself, Answer Selection, Check Your Work, Beware of Directly Quoted Answers, Slang, Extreme Statements, Answer Choice Families; Comprehensive sections covering: Federal Energy Regulatory Commission (FERC), Public Utility Regulatory Policies Act of 1978, Energy Policy Act, ASHRAE, IESNA, ICC International Code Council, Standard 62, Ventilation Rate Procedure, Air Quality Procedure, VOC Volatile Organic Compound, Typical Indoor Air Contaminants, Bioaerosol, Filtration, Life Cycle Cost (LCC) Analysis, Measurement of Air Velocity and Temperature, Pressure Measurement, Energy Use Index and Energy Cost Index, Real Power, Configurations for 3-phase Power, Three Phase Power, Variable Speed Drives, Harmonics, Coefficient of Performance (COP), IEEE Power Quality Standard 519, Psychometric Chart, Types of HVAC Systems, Chlorofluorocarbons (CFCs), Hydrochlorofluorocarbons (HCFCs), and much more...

Now there is a comprehensive reference to provide tools on implementing an energy audit for any type of facility. Containing forms, checklists and handy working aids, this book is for anyone implementing an energy audit. Accounting procedures, rate of return, analysis and software programs are included to provide evaluation tools for audit recommendations. Technologies for electrical, mechanical and building systems are covered in detail.

Topics include distributed generation, energy auditing, rate structures, economic evaluation techniques, lighting efficiency improvement, HVAC optimization, combustion and use of industrial wastes, steam generation and distribution system performance, control systems and computers, energy systems maintenance, renewable energy, and industrial water management."--BOOK JACKET.

Based on the Body of Knowledge, this book is designed to serve as a practical guide for energy professionals preparing to take AEE's Certified Energy Manager® (CEM®) examination. The reference presents an overview of the specific areas of expertise referenced in the current Body of Knowledge in a guided preparatory format, including detailed, specifically targeted reference materials. The full scope of energy calculations and problem solving strategies which must be mastered are presented, covering relevant codes and standards, energy accounting and economics, electrical, lighting and HVAC systems, motors and drives, industrial systems, building envelope, building automation and control systems, renewable energy, boiler and steam systems, thermal

storage, maintenance, commissioning, alternative financing, and much more. Green Building, LEED and Energy Star programs are also addressed. The appendix provides a broad range of useful reference tables, as well as mathematical formulas specific to each specific area of energy management addressed. While aimed at those taking the ANSI-certified CEM exam, this text is also an excellent reference to be used throughout an energy manager's professional career.

This first pre-registration course includes topics on Real Estate Essentials, Fundamentals of Real Estate, Land Ownership, Rights and Limitations, Land Description and Registration, Real Estate and Business Brokers Act (REBBA), Legislation Relevant to Real Estate, and Other Key Legislation Relevant to Real Estate Trading. These 500+ Multiple Choice Practice Questions with Detailed Answers will help you understand the basic concepts and prepare for your exam. Note: This is a non-printable eBook and includes only Practice Questions. Our Self-Study Notes are Sold Separately. For more info, please visit <https://MiniCram.com>. Features: ** 500+ Multiple Choice Questions. ** Detailed Answers and Explanations. ** Covers All Lessons in 7 Modules of the Course. ** Test and Prepare Yourself Module by Module. ** Prepare for the Exam Anywhere on Your Desktop, Laptop, Tablet, or Smart Phone.

This fully updated, comprehensive reference will guide you step-by-step in applying the principles of energy engineering and management to the design of electrical, HVAC, utility, process and building systems for both new and retrofit projects. You will learn how to do an energy analysis of any system. Detailed presentations cover electrical system optimization, state-of-the-art lighting and lighting controls, thermal storage, cogeneration, HVAC system optimization, HVAC and building controls, and computer technologies. The fifth edition includes a new chapter covering codes, standards and legislation, as well as a new chapter on compressed air systems. You'll also find coverage on use of innovative third party financing mechanisms such as performance contracting to implement energy cost reduction measures. The text is thoroughly illustrated with tables, graphs, diagrams, and sample problems with worked-out solutions.
