Many of the prisoners held by the Japanese during the WWII were so scarred by their experiences that they could not discuss them even with their families. They believed that their brutal treatment was, literally, incomprehensible. But some prisoners were determined that posterity should know how they were starved and beaten, marched almost to death or transported on 'hellships', used as slave labour - most notoriously on the Burma-Thailand railway - and how thousands died from tropical diseases. They risked torture or execution to draw and write diaries that they hid wherever they could, sometimes burying them in the graves of lost comrades. The diaries tell of inhumanity and degradation, but there are also inspirational stories of courage, comradeship and compassion. When men have unwillingly plumbed the depths of human misery, said one prisoner, the artist Ronald Searle, they form a silent understanding of what solidarity, friendship and kindness to others can mean. The diaries and interviews with surviving prisoners drawn on in SURVIVING THE SWORD will tell a new generation about that solidarity, friendship and kindness.

By the laws of statistics John Lowry should not be here today to tell his story. He firmly believes that someone somewhere was looking after him during those four years. Examine the odds stacked against him and his readers will understand why he hold this view. During the conflict in Malaya and Singapore his regiment lost two thirds of its men. More than three hundred patients and staff in the Alexandra Military hospital were slaughtered by the Japanese he was the only known survivor. Twenty six percent of British soldiers slaving on the Burma Railway died. More than fifty men out of around six hundred died aboard the Aaska Maru and the Hakasan Maru. Many more did not manage to survive the harshest Japanese winter of 1944/45, the coldest in Japan since record began. Johns experiences make for the most compelling and graphic reading. The courage, endurance and resilience of men like him never ceases to amaze.

During World War II the Japanese were stereotyped in the European imagination as

fanatical, cruel, almost inhuman - an image reflected in most books and films about prisoner of war in the Far East. While the Japanese certainly treated those they captured badly, behaving far worse to Chinese and native captives than to Europeans, the conventional view of the Japanese is unhistorical and simplistic. It fails to recognize that the Japanese were acting at a time of supreme national crisis, at a particular period of their history, and that their attitudes were influenced by a combination of their perception of their own racial identity mixed with a powerful historical tradition. This collection of essays, by both western and Japanese scholars, aims to see the question from a historical viewpoint, and from both a western and Japanese perspective, looking at it in the light of both longer-term influences, notably the Japanese attempt to establish themselves as an honorary white race. The essays also examine particular instances. Conditions in the almost self-run camp at Changi contrasted remarkably with those on the Burma Railway, where disease and a failure to provide supplies caused terrible suffering. The book also addresses the other side of the question, looking at the treatment of Japanese prisoners in Allied captivity.

Prisoners of the Japanese raises disturbing questions as well about the value placed on the lives of Allied POWs by their own supreme command. Of all military prisoners who died in the Japanese zone of captivity, more than one in four were killed by "friendly fire" ordered by General Douglas MacArthur. It is impossible not to be

seized by the horror of the POWs' ordeal. But while the inhuman cruelty of the Japanese prison camps is documented exhaustively - beyond the shadow of a doubt - the book, at its core, tells a heartening story of ordinary men, trapped in impossible circumstances, not only struggling to survive but stubbornly, triumphantly asserting their humanity.
