The Survey of Psychology series presents critical reviews of and reflects the major changes in psychological research in India. After a comprehensive introduction, this, the third volume in the series, begins with a chapter that critically highlights the major contributions in the areas of attitudes, social cognition and justice from a theoretical and cultural perspective. The second chapter examines individualistic as well as traditional collectivist Indian values arguing that both can co-exist. This is followed by a chapter on the various dimensions of poverty, the poor and deprivation. Chapter Four reviews the major theoretical approaches to the subject, and the next chapter presents the prevalent trends and shortcomings of the conceptual and methodological problems in the relatively new area of environmental psychology. Chapter Six provides various pertinent issues related with motivation, leadership and human performance within a conceptual framework and with theoretical perspectives. The last chapter critically examines the changes and the general shift in the content of research as well as the strength and weaknesses of the discipline of psychology at the start of the new millennium.
