There are plenty of books on the market which tell you how to write stylish prose, attention-grabbing headlines or market yourself better as a freelance writer. But how do you get that first piece published in a national publication? This book shows you the techniques that real freelancers use to sell their ideas and get into print. Professional freelancer Catherine Quinn, who built a successful freelance career from scratch, guides you through a step-by-step process to get your first article in print, from how to format your pitch, to identifying the undersold freelance hotspots. Her tried and tested step-by-step approach:

- Shows you how to scope the market and pick the most likely potential customers
- Gives the inside track on how to convince editors who've never heard of you to commission your work
- Tells you what to expect at every step along the pitching process
- Includes a four week plan with a day-by-day process to kick start your freelance career

Canadian cellist Erika Nielsen's bestselling memoir and wellness guide *Sound Mind: My Bipolar Journey from Chaos to Composure* was a recipient of both a 2019 Nautilus Book Award (Gold) and a 2019 Canada Book Award, and was a finalist in the Next Generation Indie Book Awards. Erika Nielsen knew that her real language was music – her truest voice, the cello – by the time she was three years old. She knew she would become a professional musician by the eighth grade. But she could never understand why sometimes she felt as if she was floating on sparkling clouds, enchanted by her own brilliance, while at other times she huddled in a dark, wretched place, sobbing and overcome with her inadequacy. At age 27, she finally found out: she was mentally ill. In this frank and courageous memoir, Erika confronts the shock of her diagnosis of bipolar disorder and chronicles how, step by step, day by day, she walked herself to a place of stability and health. Containing wellness tips and coping strategies to live creatively, productively, and healthily with a mental illness, *Sound Mind* is a story of hope, healing, and transformation that reminds us that it is possible not only to function with a mental illness, but to thrive. By promoting education, awareness and de-stigmatization of mental illness, *Sound Mind* helps write a new narrative around mental health and wellness.

The Second Edition of the bestselling *Measurement, Instrumentation, and Sensors Handbook* brings together all aspects of the design and implementation of measurement, instrumentation, and sensors. Reflecting the current state of the art, it describes

the use of instruments and techniques for performing practical measurements in engineering, physics, chemistry, and the life sciences and discusses processing systems, automatic data acquisition, reduction and analysis, operation characteristics, accuracy, errors, calibrations, and the incorporation of standards for control purposes. Organized according to measurement problem, the Electromagnetic, Optical, Radiation, Chemical, and Biomedical Measurement volume of the Second Edition: Contains contributions from field experts, new chapters, and updates to all 98 existing chapters Covers sensors and sensor technology, time and frequency, signal processing, displays and recorders, and optical, medical, biomedical, health, environmental, electrical, electromagnetic, and chemical variables A concise and useful reference for engineers, scientists, academic faculty, students, designers, managers, and industry professionals involved in instrumentation and measurement research and development, Measurement, Instrumentation, and Sensors Handbook, Second Edition: Electromagnetic, Optical, Radiation, Chemical, and Biomedical Measurement provides readers with a greater understanding of advanced applications.

The book provides a summary of results from the 14th year of the BEACH program, a continuing national study of general practice activity in Australia. From April 2011 to March 2012, 984 general practitioners recorded details about 98,400 GP-patient encounters, at which patients presented 153,218 reasons for encounter and 152,286 problems were managed. For an 'average' 100 problems managed, GPs recorded: 70 medications (including 57 prescribed, six supplied to the patient and seven advised for over-the-counter purchase); 11 procedures; 24 clinical treatments (advice and counselling); six referrals to specialists and three to allied health services; orders for 31 pathology tests and seven imaging tests. A subsample study of more than 31,000 patients suggests prevalence of the following measured risk factors in the attending adult (18 years and over) patient population: obesity - 27%; overweight - 35%; daily smoking - 15%; at-risk alcohol consumption - 25%. One in four people in the attending population had at least two of these risk factors. A companion publication, A decade of Australian general practice activity 2002-03 to 2011-12 is also available.

This reprinted edition is co-published with the Institute for the Study of Diplomacy.
