In Problem Solving, Decision Making, and Professional Judgment: A Guide for Lawyers and Policymakers, Paul Brest and Linda Hamilton Krieger prepare students and professionals to be creative problem solvers, wise counselors, and effective decision makers. The authors provide readers with knowledge of decision theory, probability and statistics, social and cognitive psychology, and arm them against common sources of judgment error. The ultimate goal is to help readers "get it right" in their roles as professionals, citizens, and individuals.

Managers and leaders of all levels need to ensure that the best decisions are taken, problems are solved in the optimum way, and the creative ideas and innovations so necessary for tomorrow's business flow freely. Decision Making and Problem Solving Strategies will help you to master the processes of practical thinking which lie behind effective decision making, problem solving and creative thinking. Using checklists, exercises and case studies it explains key concepts such as: how the mind works, the principles of effective thinking, how to develop a framework for decision making, how to use a simple model for making decisions and solving problems, how to sharpen up creative thinking skills and how to develop their thinking skills in the future.

This book is about how to make decisions using the Analytic Hierarchy Process. The basics of the theory are described in a clear, non-technical manner with many examples. It is suitable for business leaders and also is probably the best book for introducing the AHP to students at the college and graduate level. In this fifth printing of the book the reader will find a new appendix containing real-life applications that validate the use of the fundamental scale of the AHP.

Each day, managers and employees are confronted with a plethora of real problems and decisions that are creating issues suchs as lost throughput, poor quality, personnel problems, and material shortages.How they approach these daily quandaries will determine how successful they are at resolving problems and making effective decisions. It is human nature for managers to solutions before they even understand the nature of the problems they are trying to solve. As a result, they end up making blind decisions that change perfectly acceptable processes for incorrect reasons. The real secret to solving problems does not depend upon the number of sophisticated statistical tools that one applies -- The secret to solving most problems is to keep the approach simple and uncomplicated. Many managers and employees make mistakes because they fail to do what Toyota does so effortlessly -- . They fail to perform the 'genmba walk,' during which they go to see the actual process, understand the work, ask questions, and learn. By following a structured approach, and using only simple tools, most problems can be solved, effective decisions can be made, and problems prevented. The cornerstones of this book are three detailed roadmaps for solving problems, preventing problems, and making effective decisions. Each roadmap contains a step-by-step explanation on how to solve existing problems, how to prevent future problems, and how to make effective decisions. The book provides real case studies to illustrate each of the techniques presented in the book.

This new edition offers to guide the reader through the problem-solving process to reach successful, long-term solutions. Exercises and case studies illustrate the theory, and allow readers to monitor their progress.

Ensuring innovation and a creative approach to new challenges is crucial in leadership success. Being able to communicate and share your ideas takes no less skill. Decision Making and Problem Solving Strategies will help you to learn key techniques and models to confidently make the right decisions. Using checklists, exercises and case studies, Adair provides a clear framework to find solutions, generate ideas and inspire confidence in your team - so you can spot the solution in every problem, and create ideas to rival even the best strategists.

Train your brain for better decisions, problem solving, and innovation Think Smarter: Critical Thinking to Improve Problem-Solving and Decision-Making Skills is the comprehensive guide to training your brain to do more for you. Written by a critical thinking trainer and coach, the book presents a pragmatic set of tools to apply critical thinking techniques to everyday business issues. Think Smarter is filled with real world examples that demonstrate how the tools work in action, in addition to dozens of practice exercises applicable across industries and functions. Think Smarter is a versatile resource for individuals, managers, students, and corporate training programs. Thinking is the foundation of everything you do, but we rely largely on automatic thinking to process information, often resulting in misunderstandings and errors. Shifting over to critical thinking means thinking purposefully using a framework and toolset, enabling thought processes that lead to better decisions, faster problem solving, and creative innovation. Think Smarter provides clear, actionable steps toward improving your critical thinking skills, plus exercises that clarify complex concepts by putting theory into practice. Features include: A comprehensive critical thinking framework Over twenty-five "tools" to help you think more critically Critical thinking implementation for functions and activities Examples of the real-world use of each tool Learn what questions to ask, how to uncover the real problem to solve, and mistakes to avoid. Recognize assumptions you can rely on versus those without merit, and train your brain to tick through your mental toolbox to arrive at more innovative solutions. Critical thinking is the top skill on the wish list in the business world, and sharpening your ability can have profound effects throughout all facets of life. Think Smarter: Critical Thinking to Improve Problem-Solving and Decision-Making Skills provides a roadmap to more effective and productive thought.

Written specifically for the experienced nurse enrolled in an RN-to-BSN program, this text guides nurses through an interactive critical thinking process to become effective and confident nurse leaders. All nurses involved with direct patient care already rely on similar strategies to oversee patient safety, make care decisions, and integrate plan of care in collaboration with patients and families. This text expands upon that knowledge and provides a firm base to reach the next steps in academia and practice, enabling the BSN-prepared nurse to tackle serious issues in care delivery with a high level of self-awareness and skill. Leadership and Management Competence in Nursing Practice relies on a keen understanding of what experienced nurses already bring to the classroom. This text provides a core framework and useful skills and strategies to successfully lead nursing and healthcare forward. Clear, concise chapters cover leadership skills and personal attributes of leaders with minimal repetition of material covered in associate ' s degree programs. Content builds on the framework of AACN Essentials of Baccalaureate Education, IOM Competencies, and QSEN KSAs. Each chapter presents case scenarios to promote critical thinking and decision-making. Self-assessment tools featured throughout the text enable nurses to evaluate their current strengths, areas for growth, and learning needs. Key Features: Provides information needed for the associate ' s degree nurse to advance to the level of professionally prepared baccalaureate degree nurse Chapters contain critical thinking exercises, vignettes, and case scenarios targeted to the RN-to-BSN audience Self-assessment tools included in most chapters to help the reader determine where they are now on the topic and to what point they need to advance to obtain competence and confidence in the professional nursing role Provides information and skills needed by nurses in a variety of healthcare settings Includes an instructor ' s manual and PowerPoint slides

Filled with real-world examples and exercises, this practical resource presents more than 25 "tools" to apply critical thinking techniques to everyday business issues that are applicable across industries and functions, from individuals to senior executives.

Everyone encounters a wide range of difficulties, mishaps, and obstacles. You can think of a "problem" as anything from a mild irritation - like a sticky keyboard - to a complete disaster that puts your job or even your life at risk. A problem is a question or situation that causes doubt or perplexity, or presents a difficulty. It's something that needs to be corrected or overcome so you can achieve a desired state. A problem often requires a unique or creative solution. In other words, you have a "problem" when you have a goal but can't readily see how to reach it - when you have to think, plan, and devise suitable actions to solve the problem and achieve the goal. Barriers to achieving your goals can vary widely in kind and importance. Your problem might be as small as spilling coffee on your tie right before going into an important business meeting. Or it could be much more serious - say if the laptop your presentation was on got stolen and you didn't have a backup. But if you know just what to do in response to a problem, it's no longer a real problem. This is because there's no doubt or complexity involved for you - the path of action you need to take to achieve your goal is clear. Problems come in two basic varieties. The first is an unexpected disruption to the normal course of things. For example, your supplier fails to deliver crucial items or your car breaks down on your way to a conference. You may or may not know what caused the disruption. The second type is a gap between your current state and a desired state, or goal. If you aren't sure how to bridge that gap, you have a problem. For example, you might want to find ways to meet a new consumer need. Or you might want to improve your own efficiency in terms of managing your time, meeting sales targets, or designing products. Everyone needs to solve problems, from the trivial to the life-threatening, at some point.
