What creates corporate reputations and

Get Free Reputation Rules Strategies For Building

how should organizations respond?

Corporate reputation is a growing research field in disciplines as diverse as communication, management, marketing, industrial and organizational psychology, and sociology. As a formal area of academic study, it is relatively young with roots in the 1980s and the emergence of

A firm's reputation is an asset that can be built or harmed over time and most companies invest in their good standing. This can be challenged or threatened by

Get Free Reputation Rules Strategies For Building

activists seeking to change the firm's behavior, especially to reduce negative externalities and other social harms that a company may be creating. The strategic interaction takes place in the realm of private politics and corporate social responsibility-perceptions and actions of the company, activists, and the public

audience-rather than that of public policy,
including regulation. In Corporate
Reputation and Social Activism Jose
Miguel Abito, David Besanko, and Daniel
Diermeier argue that harm to a firm's
reputation is one of the strongest and most
practical tools of contemporary corporate
activism and explains the numerous

campaigns as well as the response of companies. Through a straightforward dynamic model focusing on the interaction of the firm and activists, the authors show how both the firm's existing reputation and various activist tactics influence actions and outcomes of both the firm and the activists. Among their insights are that as a

firm's reputation grows, it tends to coast on its reputation by reducing its private regulation, or voluntary adoption of internal rules that constrain certain company behavior. Activists can keep the firm from coasting in two ways: the firm acts more responsibly to protect its reputation in anticipation of activist
