From the Bottom of the Heap is the revised autobiography of Robert Hillary King, the only freed member of the Angola 3. After being convicted of a crime he did not commit in 1970, King was sent to Angola State Penitentiary where he became a Black Panther and tirelessly worked to improve conditions for prisoners. After years of beatings, starvation and solitary confinement, he was declared innocent in 2001. Somehow he never lost his humanity. In this book, King strips bare society's worth injustices and remains a beacon of human strength and capacity to overcome.

In the tradition of *The Mists of Avalon* and *Mythago Wood*, J. Robert King weaves an epic tale of Avalon, Excalibur, the Once and Future king, and the magician Merlin as he draws on the ideas and writings of Joseph Campbell to shape and interpret the legendary Arthurian mythos. dragons have awoken from millennial slumbers. First came Primordus, which stirred in the Depths forcing the asura to flee to the surface. Half a century later, Jormag awoke and drove the norn from the frozen climes of the Northern Shiverpeaks, corrupting sons and brothers along the way. A generation later, Zhaitan arose in a cataclysmic event that reshaped a continent and flooded the capital of the human nation of Kryta. The races of Tyria stand on the edge of destiny. Heroes have battled against dragon minions, only to be corrupted into service of

the enemy. Armies have marched on the dragons and been swep aside. The dwarves sacrificed their entire race to defeat a single dragon champion. The age of mortals may soon be over. This is a time for heroes. While the races of Tyria stand apart, six heroic individuals will come together to fight for their people: Eir, the norn huntress with the soul of an artist; Snaff, the asuran genius, and his ambitious assistant Zojja; Rytlock, the ferocious charr warrior in exile; Caithe, a deadly sylvari with deep secrets; and Logan, the valiant human guardian dealing with divided loyalties. Before the Brothers' War. Before the five colors of magic. Before history itself, the plane of Dominaria was ruled by the Thran. They built machines and artifacts, the likes of which have never since been seen. But amid this civilization, a shadow took root, one that would stretch its arms across space and time. The hideous evil of Phyrexia was born.

Toward the end of the year 1920 the Government of the United States had practically completed the programme, adopted during the last months of President Winthrop's administration. The country was apparently tranquil. Everybody knows how the Tariff and Labour questions were settled. The war with Germany, incident on that country's seizure of the Samoan Islands, had left no visible scars upon the republic, and the temporary occupation of Norfolk by the invading army had been forgotten in the joy over repeated naval victories, and the subsequent ridiculous plight of General

Von Gartenlaube's forces in the State of New Jersey. The Cuban and Hawaiian investments had paid one hundred per cent and the territory of Samoa was well worth its cost as a coaling station. The country was in a superb state of defence. Every coast city had been well supplied with land fortifications; the army under the parental eye of the General Staff, organized according to the Prussian system, had been increased to 300,000 men, with a territorial reserve of a million; and six magnificent squadrons of cruisers and battle-ships patrolled the six stations of the

navigable seas, leaving a steam reserve amply fitted to control home waters. The gentlemen from the West had at last been constrained to acknowledge that a college for the training of diplomats was as necessary as law schools are for the training of barristers; consequently we were no longer represented abroad by incompetent patriots. The nation was prosperous; Chicago, for a moment paralyzed after a second great fire, had risen from its ruins, white and imperial, and more beautiful than the white city which had been built for its plaything in 1893.

Everywhere good architecture was replacing bad, and even in New York, a sudden craving for decency had swept away a great portion of the existing horrors. Streets had been widened, properly paved and lighted, trees had been planted, squares laid out, elevated structures demolished and underground roads built to replace them. The new government buildings and barracks were fine bits of architecture, and the long system of stone quays which completely surrounded the island had been turned into parks which proved a god-send to the population. The subsidizing of the state

theatre and state opera brought its own reward. The United States National Academy of Design was much like European institutions of the same kind. Nobody envied the Secretary of Fine Arts, either his cabinet position or his portfolio. The Secretary of Forestry and Game Preservation had a much easier time, thanks to the new system of National Mounted Police. We had profited well by the latest treaties with France and England; the exclusion of foreign-born Jews as a measure of self-preservation, the settlement of the new independent negro state of Suanee, the

checking of immigration, the new laws concerning naturalization, and the gradual centralization of power in the executive all contributed to national calm and prosperity. When the Government solved the Indian problem and squadrons of Indian cavalry scouts in native costume were substituted for the pitiable organizations tacked on to the tail of skeletonized regiments by a former Secretary of War, the nation drew a long sigh of relief. When, after the colossal Congress of Religions, bigotry and intolerance were laid in their graves and kindness and charity began

The bestselling, widely heralded, Jungian introduction to the psychological foundation of a mature, authentic, and revitalized masculinity. Redefining age-old concepts of masculinity, Jungian analysts Robert Moore and Douglas Gillette make the argument that mature masculinity is not abusive or domineering, but generative, creative, and empowering of the self and

others. Moore and Gillette clearly define the four mature male archetypes that stand out through myth and literature across history: the king (the energy of just and creative ordering), the warrior (the energy of aggressive but nonviolent action), the magician (the energy of initiation and transformation), and the lover (the energy that connects one to others and the world), as well as the four immature patterns that interfere with masculine potential (divine child, oedipal child, trickster and hero). King, Warrior, Magician, Lover is an exploratory journey that

Civilization has now reached a crucial tipping point. Mountains of easy money, leveraged into the stratosphere by unscrupulous dealers in inscrutable financial derivatives, have ensnared entire nations in a web of debt. The nations and financiers are locked in a

pushing match. The only unsettled question at this particular juncture is whether the nations will decisively act in the interests of their people and shut down the financial system that is looting the world or whether they will allow the banks to foreclose upon them, thereby effectively ending the era of sovereign nation states and ushering in a banker's global dictatorship. Bible prophecy supplies the answer. Jehovah Himself Has Become King offers a fresh and unique understanding of prophecy from the standpoint of the vital role that Jehovah's Witnesses have

played upon the world stage in recent times. But contrary to the Watchtower's prophetic exegesis focused on an invisible parousia for the past nearly 100 years, this work points forward to the visible manifestation of Christ to the chosen ones during the three and one-half year period outlined in the Scriptures as the time of the end.
