Published by OpenStax College, U.S. History covers the breadth of the chronological history of the United States and also provides the necessary depth to ensure the course is manageable for instructors and students alike. U.S. History is designed to meet the scope and sequence requirements of most courses. The authors introduce key forces and major developments that together form the American experience, with particular attention paid to considering issues of race, class and gender. The text provides a balanced approach to U.S. history, considering the people, events and ideas that have shaped the United States from both the top down (politics, economics, diplomacy) and bottom up (eyewitness accounts, lived experience).

In this Second Edition of this radical social history of America from Columbus to the present, Howard Zinn includes substantial coverage of the Carter, Reagan and Bush years and an Afterword on the Clinton presidency. Its commitment and vigorous style mean it will be compelling reading for under-graduate and post-graduate students and scholars in American social history and American studies, as well as the general reader.

Understanding the Constitution has been primarily designed for secondary school students of United States history and government. The book's usefulness extends to immigrants taking citizenship courses as well as adult general readers. The text includes informative essays, charts, graphs, twenty-five lessons, quizzes, examinations, topic locator, glossary, copies of the Articles of Confederation and the Constitution of the United States, as well as a selected bibliography. This work represents a much needed exploration of a subject essential in the education of all Americans. About the Author Henry T. Conserva has taught in the public schools of California for over fifty years. He has been a curriculum specialist in social studies for the San Francisco Unified School District and has taught student teachers at San Francisco State University. He has done postgraduate study at Tel Aviv University in Israel and at Harvard's Japan Institute. He is the author of Earth Tales, Propaganda Techniques, Tips for Teachers and the Illustrated Dictionary of Physical Geography.
