One of the most fundamental paradigms of nearly all programming languages is the ability to store values in variables, and later retrieve or modify those values. In fact, the ability to store values and pull values out of variables is what gives a program state.

The only way the JS engine could know, at the line where the error is thrown, that the next statement would declare a block-scoped variable of the same name (greeting) is if the JS engine had already processed this code in an earlier pass, and already set up all the scopes and their variable associations. This processing of scopes and declarations can only accurately be accomplished by parsing the program before execution.

This design approach can be quite useful, and certainly can make full use of the “dynamic” nature of JavaScript variables to take on values of different types as needed. On the other hand, if you don't take careful precautions, variables existing across the entirety of a scope can lead to some unexpected pitfalls.

and beyond."Scope & Closures" examines all aspects of lexical scope, then builds on these principles to leverage the power of closure, and finally digs into the module pattern for better program structure.

No matter how much experience you have with JavaScript, odds are you don ' t fully understand the language. As part of the "You Don ' t Know JS" series, this compact guide focuses on new features available in ECMAScript 6 (ES6), the latest version of the standard upon which JavaScript is built. Like other books in this series, You Don ' t Know JS: ES6 & Beyond dives into trickier parts of the language that many JavaScript programmers either avoid or know nothing about. Armed with this knowledge, you can achieve true JavaScript mastery. With this book, you will: Learn new ES6

syntax that eases the pain points of common programming idioms
Organize code with iterators, generators, modules, and classes
Express async flow control with Promises combined with generators
Use collections to work more efficiently with data in structured ways
Leverage new API helpers, including Array, Object, Math, Number, and String
Extend your program ' s capabilities through meta programming
Preview features likely coming to JS beyond ES6

It ' s easy to learn parts of JavaScript, but much harder to learn it completely—or even sufficiently—whether you ' re new to the language or have used it for years. With the "You Don ' t Know JS" book series, you ' ll get a more complete understanding of JavaScript, including trickier parts of the language that many

As part of the "You Don ' t Know JS" series, this concise yet in-depth guide focuses on new asynchronous features and performance techniques—including Promises, generators, and Web Workers—that let you create sophisticated single-page web applications and escape callback hell in the process. Like other books in this series, You Don ' t Know JS: Async & Performance dives into trickier parts of the language that many JavaScript programmers simply avoid. Armed with this knowledge, you can become a true JavaScript master. With this book you will:

- Explore old and new JavaScript methods for handling asynchronous programming
- Understand how callbacks let third parties control your program ' s execution
- Address the "inversion of control" issue with JavaScript Promises
- Use generators to express async flow in a sequential, synchronous-looking fashion

Functional-Light JavaScript is a balanced, pragmatic exploration of Functional Programming in JavaScript. Functional Programming (FP) is an incredibly powerful paradigm for structuring code that yields more robust, verifiable, and readable programs. If you've ever tried to learn FP but struggled with terms like "monad", mathematical concepts like category theory, or symbols like (lambda), you're not alone. Functional-Light programming distills the most vital aspects of FP-function purity, value immutability, composition, and more!-down to approachable JavaScript patterns. Rather than the all-or-nothing dogmatism often encountered in FP, this book teaches you how to improve your programs line by line.
